PERSONAL PROJECTS

Chat Box (10/2022 - 10/2022) [🔗](#)

- It is a real time chat based user friendly website wherein many people have an access to chat at a particular point of time. Also, it notifies the people already using the chat box whenever a new user joins the chat with a pop up sound. The website uses HTML, CSS, JavaScript and basic concepts and Socket IO.

ToDo List App (10/2022 - 11/2022) [🔗](#)

- This website offers users a very good user experience with creating their own ToDo - Lists. It also offers users with various other options like deleting and updating the list created by them. It uses the concept of local storage for saving the ToDo- list. This helps the user to revive his/her data in case the system shuts down or the user mistakenly closes the website.

Password Generator (10/2022 - 11/2022) [🔗](#)

- This user friendly website offers people with various categories of generating passwords. Categories in the above mentioned include generation of passwords like super - strong password, strong password, funny password and weak password among others. This website uses the concept of object oriented programming.

Portfolio [🔗](#)

- This is a fully responsive website. The website is made by using only CSS, HTML & JavaScript.
